

Ankitha Mariam Mani

Gameplay & Systems Programmer

Kerala, India • Asia/Kolkata • Open to collaborative game projects

PROFILE

Gameplay and systems programmer focused on building responsive game mechanics, player systems, AI behaviours, and reusable gameplay frameworks. Experienced with C++ and C#, with hands-on work in Unreal Engine and Unity. Interested in gameplay programming, game AI, multiplayer systems, and technical problem solving. Enjoys collaborating with designers and artists to turn game concepts into polished interactive experiences.

TECHNICAL SKILLS

Programming	C++, C#, Gameplay Programming, Gameplay Systems, Game AI, Multiplayer Networking, Physics Programming, Procedural Generation, Animation Programming
Engines	Unreal Engine, Unity
Tools	Git, GitHub, Perforce (Helix Core), Visual Studio, JetBrains Rider, RenderDoc
Domains	Core Gameplay & Mechanics, Game AI & Behavioral Systems, Multiplayer & Networking, Physics & Simulation

PROFESSIONAL EXPERIENCE

Gameplay Programmer | PixelForge Interactive

Kochi, India | Jun 2023 – Present

Developed gameplay systems and player mechanics using C++ and Unreal Engine. Implemented character movement, combat interactions, gameplay states, AI behaviours, and reusable gameplay components.

Technologies: C++, Gameplay Programming, Gameplay Systems, Game AI, Unreal Engine, Git

Junior Game Programmer | Blue Ember Games

Bengaluru, India | Jan 2022 – May 2023

Worked on gameplay programming and interactive systems for small PC and multiplayer prototypes. Implemented gameplay mechanics, physics interactions, basic networking functionality, and debugging tools.

Technologies: C#, C++, Unity, Multiplayer Networking, Physics Programming, GitHub

Game Development Intern | IndieArc Studio

Remote | Jun 2021 – Dec 2021

Assisted with gameplay prototyping and debugging for experimental action and RPG projects. Implemented gameplay features, tested mechanics, fixed bugs, and integrated assets and animations into Unity prototypes.

Technologies: C#, Unity, Gameplay Programming, Animation Programming, Git

SELECTED PROJECTS

Shadow Protocol

Gameplay Programmer | Unreal Engine | Action / FPS | PC

A first-person action prototype focused on responsive combat and enemy encounters. Implemented player movement, weapon systems, combat interactions, enemy AI, damage systems, and gameplay state management.

Technologies: C++, Gameplay Programming, Gameplay Systems, Game AI, Physics Programming

Echoes of Aether

Systems Programmer | Unity | RPG | PC

An RPG prototype featuring modular character abilities, procedural encounter generation, and AI-driven enemy behaviour. Designed reusable systems for abilities, combat states, enemy decision-making, and progression.

Technologies: C#, Gameplay Systems, Procedural Generation, Game AI, Animation Programming

Riftbound Arena

Gameplay Programmer | Unreal Engine | TPS | PC

A multiplayer third-person combat prototype exploring networked player movement, combat interactions, physics-based gameplay, and synchronized gameplay states.

Technologies: C++, Multiplayer Networking, Gameplay Programming, Physics Programming, Gameplay Systems

EDUCATION

Bachelor of Computer Applications

St. Joseph's College of Computer Applications | Jun 2019 – May 2022

Studied computer programming, software engineering, data structures, databases, and application development, with additional independent work in game programming and interactive systems.

ADDITIONAL

Genres: Action, RPG, FPS, TPS, Survival **Platforms:** PC, PlayStation, Xbox
